

STOWAWAY TILT & TRANSFER TABLE

STT1
500 lbs [225 kg]

**A GREAT SPACE
 SAVER IN THE SHOP.
 A GREAT TIME SAVER
 ON THE JOBSITE.**

FROM THIS:

A FULL-SIZE CUTTING TABLE

The Stowaway features a generous work surface and a rugged, long-lasting felt top designed to reduce vacuum stick when used for cutting glass or other nonporous materials. High-strength construction provides durability without excess weight. Crossed support legs ensure a rigid and stable work surface with 500 lbs [225 kg] load capacity.

 & TRUSTED NAME
 IN VACUUM LIFTING
 EQUIPMENT**

TO THIS:

AN EASY-TO-USE TILT TABLE

The scissor-action tilt design of the Stowaway floats the pivot point forward as the top lifts, providing nearly effortless manual tilt . . . without the extra weight of a counter-balanced system. Nylon washers make movements smooth and quiet. Nylon rollers support glass, laminate or other sheet materials when tilted and can be moved out of the way when not needed.

THE STOWAWAY TILT TABLE

Fold up the base section and pull back the stabilizing arm to lock the legs into place . . . ready to stow or roll. With its compact profile, the Stowaway is easy to stow against a wall, roll along narrow aisles, slip through doorways, and fit on freight elevators. When folded, it can even be transported to a jobsite. Used as a rack for glass or other sheet materials, the Stowaway can be loaded from the front or from the side! Sheets roll easily and gently across the nylon support rollers.

Assembly required. Also available without top for alternative applications.

STOWAWAY TILT & TRANSFER TABLE

- Full-size work table folds to a compact profile for convenient storage when not in use.
- Removable nylon load rollers enable end-loading of glass and other delicate materials in the upright position.
- Rolls easily from one work station to another on large, rubber-coated casters with foot-operated brakes, to keep the table from wandering.
- A unique tilt mechanism enables nearly effortless tilting of materials between flat and upright positions.
- Rugged, long-lasting felt surface reduces vacuum stick and prevents damage to glass or other delicate materials.
- High-strength construction gives durability without excess weight, while crossed leg design ensures a rigid and stable work surface.
- When folded, the table stows against a wall, rolls along narrow aisles, slips through doorways, and fits on freight elevators.
- One worker can easily tilt and transfer loads, improving efficiency and reducing production costs.
