The Ace Dolly from Wood's Powr-Grip® features a unique mast design with manually operated vacuum cups, to lift and transport glass without the need for external power, cranes or high ceilings.

AD3N6292

The Ace Dolly eliminates the need for external power, overhead cranes and high ceilings. Capable of handling glass sizes to 130" x 144" [3302 x 3658 mm], it efficiently lifts and carries large glass where other glass transport systems can't. The versatile design permits glass transfers from either the face or the end of storage racks and cases. A unique mast design features manually operated vacuum cups that grip glass and hold it securely for transport. Smooth gliding rubber rollers support glass weight and ease movement when loading from the end. The manually operated auto-brake winch locks and releases in any position. In use for more than 20 years, the Ace Dolly makes lifting large lites a quick and efficient one-person job.
