

# WOOD'S POWR-GRIP® CUSTOM DC-POWERED COUNTERBALANCE LIFTER WITH REMOTE CONTROL

**CB2DCS**  
1600 lbs [725 kg]

(when used with Wood's Powr-Grip's P1-DC, P2-DC & MRTALP Series vacuum lifters)

The CB2DCS Counterbalance Lifter is for use with a crane (or other hoisting equipment) to lift and position windows under gables, overhangs and similar obstructions, by extending the load away from lift slings. This lifter's unique design features a DC-powered counterbalance, which moves on demand along a rugged I-beam to keep the lifter balanced, whether loaded or unloaded.

<b>Maximum Load Capacity</b>	<b>1400 lbs [635 kg]</b> (Including weight of optional vacuum lifter)
<b>Reach</b>	Minimum: 55" [140 cm] Maximum: 69" [175 cm]
<b>Overall Length</b>	154½" [393 cm] (Does not include load or optional vacuum lifter)
<b>Lifter Weight</b>	1040 lbs [472 kg] (Does not include user-supplied ballast material)
<b>Standard Operating Power</b>	12 volts DC, 58 amps
<b>Available Options</b>	Available for lease

## Features

- **DC-Powered Counterbalance** provides effortless counterweight motion, enabling the operator to keep the lifter balanced at all times.
- **Radio Remote Control** enables the operator to control the counterbalance from distances up to 250 ft [76 m] away, as required for window installations in multi-story structures. Note: When paired with remote controlled Powr-Grip vacuum lifters, also syncs with apply and release controls.
- **Fixed & Universal Hook Mounts** provide customized, stable attachment of specific Powr-Grip vacuum lifters, plus the flexibility to attach virtually any kind of vacuum lifter or end effector.
- **Battery Gauge** with segmented LED's allows the operator to visually assess the current energy level of the battery and instantly determine whether charging is needed.
- **Amber Strobe Light** signals to area personnel that a counterweight adjustment is imminent, in case a reaction is required. Note: When paired with remote controlled Powr-Grip vacuum lifters, also warns that load release is imminent.
- **White Indicator Light** signals when counterweight has reached the forwardmost position, enabling the operator to release the load remotely with minimal lifter movement.

Wood's Powr-Grip products are sold through authorized dealers.

The Counterbalance Lifter comes with radio remote controls, to adjust the counterweight position during multi-story window installations, as well as on-board controls for use on the ground or in a man lift. A specialized fixed mount enables the CB2DCS to be used in conjunction with Powr-Grip's P1-DC, P2-DC and MRTALP Series vacuum lifters, while a universal hook mount accommodates all other kinds of vacuum lifters and end effectors. Powr-Grip's Channel Lifters can also be inverted on the Counterbalance Lifter for reverse-angle installations, such as those in airport control towers. In short, the CB2DCS Counterbalance Lifter represents a dramatic improvement in safety, versatility and functionality over other available designs.
